## Ingredient

**Algalithe®** comes from *Lithothamnion calcareum*, a red algae of the corallinaceae family. It's mineral composition consists of greater than 32% elemental calcium, greater than 2% elemental magnesium and trace minerals. Its richness in calcium and magnesium make **Algalithe®** an ideal choice for bone health products, and electrolyte formulas.

The calcium carbonate composing **Algalithe®** is present in two complementary crystalline forms, calcite and aragonite, which allow a progressive release of calcium in the intestine, enhancing absorption.

## Key Highlights

### NPN ##80128504 Health Claims

- Helps in the development and maintenance of bones and teeth.
- Adequate calcium as part of a healthy diet
- May reduce the risk of developing osteoporosis
- Source of/provides electrolytes
- Helps to maintain/support muscle function
- Helps maintain/support bone health

### Clinical Dosage

500mg 1-5 times per day

### Shelf Life

36 months

### Quality Control

- Halal
- Kosher
- Non-GMO (NGPV in process)
- Vegan
- FSSC 22000

### Applications/Delivery Format

- Powder
- Capsule
- Tablet
- Sachet
- Stick Pack

### Product Composition

- Greater than 32% Elemental Calcium
- Greater than 2% Elemental Magnesium
- Additional Trace Minerals

### Country of Origin

- Manufactured in France
- Harvested in the North Atlantic

### Sustainability

Harvested in a sustainable manner
