

Finished Product

**FiveLac®**

**FiveLac®** was the second addition to our Probiotic line, harnessing all the power of **ThreeLac®** with the addition of two more scientifically studied strains of good bacteria for increased benefits. The 5 strains of friendly flora in this powerful probiotic work synergistically to repopulate beneficial flora in the intestines; competes with harmful microorganisms (such as *Candida albicans*) for space and nutrients; enhances digestion of proteins, fats, and carbohydrates; and supports immune function, since much of the immune system resides in the gut. Offered in Single Dose Stick Packs.

Key Highlights

**How FiveLac® Supports You**

Unlike many probiotics that die in stomach acid, **FiveLac®** uses a **micro-encapsulation process** that protects the live bacteria as they pass through the acidic environment of the stomach.

Once in the alkaline environment of the intestines, the coating dissolves and releases the active bacteria where they can colonize.

This protective delivery system is a key part of why **FiveLac®** tends to have higher survival rates and efficacy compared to standard probiotics.

**FiveLac®** was formulated with both gut health and vaginal health in mind, working to help maintain a healthy balance of *Candida albicans* and other types of yeast throughout the intestinal tract.

**Intended Benefits**

- Addresses occasional digestive upset, bloating, or irregularity.
- Addresses yeast imbalance (especially *Candida* overgrowth).
- Immune support.
- General gut flora maintenance after antibiotics or poor diet.

**Shelf Life**

- 2-Year Shelf Life from Manufacture Date.

**Probiotic Strains**

- *Bacillus coagulans*.
- *Bacillus subtilis*.
- *Enterococcus faecalis*, sub-strain F-100.
- *Lactobacillus acidophilus*.
- *Bifidobacterium longum*.

**Country of Origin**

Japan

**Available for White Label**
