

Finished Product

Pure Wild Marine Phytoplankton

OceanBloom® Marine Phytoplankton is a whole-food marine microalgae supplement providing natural, balanced nutrition for overall health and vitality. This product is produced solely using the pure OceanBloom® ingredient. Harvested from the clean coastal waters of Vancouver Island, this superfood contains up to 80 different phytoplankton species — delivering a full spectrum of essential nutrients in their most bioavailable form.

Key Highlights

Nutritional Composition

Nutrient-packed superfood that nourishes the body and reinforces cognitive function, energy levels, and physical performance.

Contains a synergistic blend of amino acids, essential fatty acids, trace minerals, carotenoids, vitamins, chlorophyll, and proteins — all derived directly from marine microalgae
