

Ingredient

Oselan®

OSELAN® A seawater concentrate obtained through a unique production process that is a result of traditional salt harvesting and a unique byproduct in OSELAN®, thereby contributing to a sustainable and renewable marine source. Offered in Powder Form.

OSELAN® is rich in silicon, bromide, boron and magnesium, with concentration factors above 80, and contains at least **22 minerals and trace elements**. Composition is 100% Ocean Minerals and 100% Water Soluble.

The co-product methodology results in a Sea Mineral Blend that has a lower concentration of sodium chloride [NaCl].

Its composition of 22 essential trace elements is required by the human body. These trace elements, present in their natural form from seawater, play a vital role in supporting physiological functions and overall health.

The material demonstrates high solubilization rates in the digestive tract, thereby supporting high bioavailability. Serves as an ideal electrolyte material.

Key Highlights

NPN #8012755 Health Claims

- Helps to maintain (proper) muscle function.
- Helps in energy metabolism.

Clinical Dosage

1g once daily.

Shelf Life

30 months from Manufacture Date.

Standardization

11.0% Magnesium, 8.0% Sodium,
3.2% Potassium, 0.0437% Boron,
0.0028% Silicon.

Quality Control

- Halal
- Kosher
- Non-GMO (NGPV in process)
- ISO50001
- Vegan
- FSSC 22000

Sustainability

Ethically and Sustainably Harvested.

Applications/Delivery Format

- Powder
- Capsule
- Gummy
- Sachet
- Stick Pack
- Tablet

Country of Origin

France
